Sir:

Applicants bring to the PTO's attention that the priority claim by applicants in the above-identified patent application is omitted from the Filing Receipt. It is respectfully requested that the PTO correct the error, and include such a priority claim on the Filing Receipt and all other official records. Accordingly, a copy of the Filing Receipt, with the additional priority data noted in red, is enclosed.

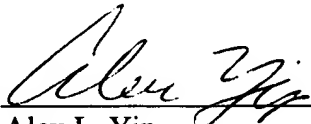

As a matter of fact, such priority data was duly provided by applicants on both the

Serial No. 09/918,867

cover page of the patent application and the Declaration previously filed. For your convenience, a copy of the application cover page and the Declaration is also enclosed.

Your prompt issuance of the corrected Filing Receipt will be greatly appreciated.

Respectfully,

By

TECHNIQUE FOR RETURNING CALLS
IN RESPONSE TO RECEIVED MESSAGES

This application claims the benefit of U.S.
Application Serial No. 08/816,921 filed on March 13, 1997
under 35 U.S.C. § 120.

5 Field of the Invention

The invention relates to a communications system
and method, and particularly to a system and method for
facilitating communications between a calling party and a
called party of a communication call, e.g., telephone call.

10

Background of the Invention

It is a common experience to call a telephone
operator for information assistance. In a typical
information assistance call, a caller identifies to the
15 operator the name and address of a party whose telephone
number is desired. In response, the operator locates the
desired destination number using, e.g., a computer database.
The destination number is then provided to the caller, e.g.,
by a computerized voice response unit (VRU) which provides
20 automated voicing of the number, and the caller is afforded
an option to be connected to the destination number without
the need of first terminating the information assistance
call.

It is also known in prior art that a voice
25 messaging service may be provided in the event that a caller
when calling a called party encounters a busy signal or a
ring-no-answer condition. One such voice messaging service
is disclosed, e.g., in U.S. Patent No. 5,414,754.
Specifically, when the caller encounters a busy signal or a
30 ring-no-answer condition in reaching the called party, a
